TREADSURE 205

Description:

Treadsure 205 by Mat.Works Entrance Solutions has been designed not just for extremely heavy footfall but also with wheeled traffic entrances in supermarkets, retail, education, and healthcare in mind - providing an alternative to aluminium matting systems. Manufactured from nitrile rubber to provide optimum performance and has a host of key features that set the product apart from any other standard modular matting system.

One of these is its sheer durability, which is provided by the product size and weight, ensuring it is one of the heaviest modular matting solutions available on the market. This sturdiness of Treadsure 205 provides significant durability when installed. It will not expand, contract, fade or become brittle, nor will it bend or buckle under pressure making it an ideal heavy contract solution for entrance areas in every sector.

The weight ensures, when installed correctly, that Treadsure will not move or slip in the matwell. It also makes installation easier, as there are no click or interlocking systems. If more than one system is needed, the modules are simply placed next to each other - significantly reducing any potential installation times.

Simple to install in most matwells.

Weight cannot be rivalled in the current market.

Will not buckle or bounce under pressure, making it suitable for wheel and trolley traffic.

Perfect for healthcare environments due to its copper compounds - a material that has been proven to have anti-microbial properties, combating the spread of hospital-acquired infections, including MRSA. Can be fitted with a host of carpet inserts and debris channel fillers to match any style

Can be fitted with a host of carpet inserts to match any style.

A cost-effective solution when compared to aluminium products.

Technical data:

Module Size	205cm x 50cm x 12mm / 18mm
Seamless Installation	Seamlessly place two or more modules next to each other without the need for any locking mechanism
Composition	Nitrile rubber composition
Performance	Nitrile rubber is resistant to oil, grease, and fuel
Wear Classification	Heavy Contract Class 33
Weight	14,000gsm (12mm), 20,000gsm (18m)
Fire Rating	Cfl-s2
Anti-Microbial	Tested to ISO 22196
Anti-Slip	TRRL Pendulum test - very low risk for slips in both dry and wet conditions
